OBJECTIVE

MCA student seeking an AI Intern role, with hands-on experience building AI/ML-powered applications, including an LLM-integrated interview preparation platform (Google Gemini and OpenAI APIs) and an AI-assisted platform for farmers. Strong foundation in Python, Java, SQL and full-stack web development, and keen to apply it to building, evaluating and deploying practical AI solutions.

EDUCATION

St Aloysius College (PG) — Currently Pursuing
Master of Computer Applications (MCA) | CGPA (Sem I & II): 8.7/10

St Aloysius College (Deemed to be University) April 2025
Bachelor of Computer Applications (BCA) | CGPA: 8.31/10

Sharada PU College April 2022
Commerce | Percentage: 93.3%

PROJECTS

InterviewForge AI — Adaptive AI Interview Preparation Platform
MEAN Stack (MongoDB, Express, Angular, Node.js), Google Gemini API, OpenAI API, Judge0, Monaco Editor, Chart.js

- Built a full-stack AI interview coach with adaptive questioning, a coding lab (Monaco, Judge0) and a progress dashboard.
- Integrated **Google Gemini and OpenAI APIs** with a fallback engine to score answers and review code; difficulty adapts to candidate performance.
- Scores answers on accuracy, relevance, completeness and clarity, and reviews code for complexity and optimisations; secured with JWT-based REST APIs.

KisanMitra — AI-Powered Platform for Farmers and Rural Workers

- Team project: an AI/ML-powered application supporting farmers, agricultural workers and skilled labourers.
  - Crop disease detection (AI/ML)
  - Crop market insights
  - Weather updates
  - Multi-language support
  - AI-powered assistant and Crop AI assistance
  - Marketplace for agricultural labour and equipment
  - Worker and service listings
  - Government schemes and agricultural news

Disaster Alert and Communication System

- Web-based platform that enables authorities to create and broadcast disaster alerts instantly, with alerts displayed to the public in real time through a simple, accessible interface. It enables quick communication, reduces misinformation, and helps people take timely preventive action during emergencies.

ACTIVITIES

- Hackathon: CodeSprint 2026
- Hackathon: Future Sprint (8 hours)
- Ideathon: Innovision 2026 [Top 6]

SKILLS

AI / ML: LLM API integration (Google Gemini, OpenAI), prompt-driven evaluation, adaptive logic, crop disease detection (KisanMitra)
Programming: Python, Java, C, C++, C#, SQL, PHP, JavaScript, CSS, .NET Framework
Web & Data: MongoDB, Express.js, Angular, Node.js, REST APIs, JWT authentication, Chart.js, Bootstrap
Areas of Interest: AI/ML, generative AI and LLM applications, data processing, databases, web applications
Certifications: Cyber Security (NPTEL), Introduction to Cloud Computing, Basics of Python, Introduction to AI, Artificial Intelligence for All, Generative AI for All, Bootstrap
